### Advanced Training Sessions

---

*Register through the Zoom links below:*

- [Advanced Workflows for Structure, Grading, and Collaboration in Canvas](#)
- [Making the Most of Modules: Designing for Student Success](#)
- [Advanced Grading & Gradebook Setup](#)
- [Empowering Student Collaboration on Canvas](#)

**Canvas Advanced Training Sessions** are targeted, hands-on sessions for faculty who are ready to deepen their Canvas expertise and explore more advanced instructional workflows. Completion of Canvas Essentials (or equivalent experience) is strongly recommended prior to attending these sessions to ensure participants can fully engage with the content.

These sessions are virtual and led by a Canvas consultant and are **highly interactive, incorporating breakout groups for guided practice and peer exchange**. To participate fully, all attendees should have their Canvas sandbox course open and ready at the start of the session. Session materials and resources will be shared via email following the training. Sessions are on Zoom.

***Topics may include:***

- Designing interactive modules to support student engagement and learning pathways
- Advanced grading workflows, including efficiency tools and feedback strategies
- Fostering collaboration with canvas by leveraging groups and peer review
